DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 16-18, 31, and 32 and 38-42, drawn to exposure method and method for manufacturing a device, classified in class 430, subclass 311.
 - II. Claims 43-53, drawn to a scanning exposure apparatus, classified in class 355, subclass 53.
 - III. Claims 54-66, drawn to a projection exposure apparatus, classified in class 355, subclass 67.
 - IV. Claims 67-79, 94 and 97, drawn to a projection optical system having multiple component lenses with (+-+-) arrangement, classified in class 359, subclass 766.
 - V. Claims 80-92, 95 and 98, drawn to a projection optical system having multiple component lenses with (+-+-), classified in class 359, subclass 763.
 - VI. Claims 93, 96, 99, drawn to a projection optical system, classified in class 355, subclass 67.
 - VII. Claims 100-103, drawn to a scanning exposure apparatus, classified in class 355, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-VII are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used

Art Unit: 2851

to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice another and materially different process such as exposing a resist layer for forming an etching mask.

3. Inventions II-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-VII have separate utilities as they are independently functional and deemed to be used in a scanning exposure apparatus or step and repeat exposure apparatus or a laser beam machining device. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
